BISCOM SOLUTIONS

Biscom provides healthcare enterprises with scalable software and services that reduce costs, increase efficiencies, and improve data security.

ENTERPRISE FAX SERVERS

On-premises FAXCOM® fax servers provide scalability for mission-critical production fax needs. Supports virtualization, Fax over IP (FoIP), Exchange, Active Directory, business continuity, mobile devices, and auto routing to and from desktops.

HOSTED CLOUD FAX SERVICE

FAXCOM® *Anywhere* offers an enterprise fax cloud-based SaaS solution. It works seamlessly with FAXCOM servers in a hybrid fax platform.

SECURE FILE TRANSFER AND COLLABORATION SOFTWARE

Fast, simple, secure file transfer & collaboration solution for large and confidential documents. AES 256-bit encryption of data in transit and at rest. Replaces FTP, email attachments, CDs, and file sharing websites.

DIGITAL FAX SOFTWARE

Send and receive encrypted, color, high resolution medical images and documents faster, and securely to PCs, color printers, or mHealth devices completely over IP networks.

FILE CONVERSION SOFTWARE

Convert and view PCL, PDF and PostScript documents to and from multiple file formats for faxing, imaging, and printing.

PROFESSIONAL SERVICES

Biscom can help you design, test, and implement automated solutions that replace costly manual procedures, such as scheduling hospital patient tests and appointments. Develop fax- and secure-file-transfer-enabled applications to improve security and drive workload efficiencies.
